Vegetable Plants

We have twenty acres in garden, therefore we make a specialty of raising vegetable plants, raising, setting and shipping hundreds of thousands of plants annually. We ship large quantities of plants to distant states and territories. Our system of packing is so complete that we rarely ever have any plants damaged. All vegetable plants sent out by us are raised from the same seed that we use ourselves; in fact we do not offer any plants for sale that we do not set out large quantities from the same beds in our own garden. All plants are raised from the best of seeds, regardless of cost of seeds. Early cabbage should be set out in April—the sooner the better; second early, about May 1st; late cabbage from May to the last of July.
